PROFILE

Innovative AI Product Manager and experienced QA Team Lead with strong technical expertise in LLMs, GenAI, and Automation. Proven track record in leading the definition and implementation of AI capabilities while managing QA teams and complex testing strategies. Skilled in bridging the gap between technical teams and business goals

WORK EXPERIENCE

Lecturer & Teaching Assistant (AI Development) New Media College & Ben-Gurion University

2025 - Present

- Lecturer and mentor in AI development and AI Agents courses.
- Teaching practical implementation of LLMs and advanced development methodologies.

TA9 (2023-2025)

2025 - Present

AI Product Manager

- Team Management: Managed a team of 3 mid-senior QA engineers (manual & automation).
- Testing Strategy: Orchestrated comprehensive testing strategies, encompassing manual, API, and UI automated tests for a complex big data platform.
- Automation: Managed the automation flow written in TS on Playwright (code review, priority).
- Optimization: Reduced bug resolution time by 20% through enhanced QA-Dev collaboration

QA Team Lead

2023 - 2025

- Team Management: Managed a team of 3 mid-senior QA engineers (manual & automation).
- Testing Strategy: Orchestrated comprehensive testing strategies, encompassing manual, API, and UI automated tests for a complex big data platform.
- Automation: Managed the automation flow written in TS on Playwright (code review, priority).
- Optimization: Reduced bug resolution time by 20% through enhanced QA-Dev collaboration

QA Engineer (Manual + Automation)

2021-2023

LocalizeOS/Madlan

- As the sole QA member in a development squad, I was responsible for planning and authoring all sprint tests to ensure the quality of software products.
- I actively collaborated with the product team and undertook various product-related responsibilities e.g. market research and interface design suggestions which increased retention by 7%.
- Proficient in both SQL and NoSQL databases, including MongoDB and PostgreSQL.
- Conducted comprehensive testing on both front-end and back-end components, spanning both server and client applications.
- Experience in end-to-end and smoke tests using Typescript in Node.js and on Cypress framework, as well as API testing.

Senior QA and System Analyst

2019-2021

IAI, missiles division

- System Analysis: Conducted thorough system characterization and authored formal STD/STP protocols for client/server applications.
- Technical Delivery: Developed C# automation scripts and delivered end-to-end products to international clients

QA Engineer and Team lead

2017-2019

Classified projects at IAI and Elbit systems

- Team Management: Led a team of 3-4 QA engineers, assigning missions, prioritizing tasks, and providing supervision.
- Hands-on: Combined management with hands-on testing (20%) of command and control software to ensure operational functionality

Head of QA

2010-2013

Military Service: Leading QA engineer, technology division, IDF

- Established QA frameworks for new applicative products and managed a team of QA engineers.
- Brigadier General's Excellence award for exceptional achievements and contributions during military service.
